\$150 per student

Starts: Sept. 28, 2015

This five week, online delivery of the Officer Development Program is a condensed version of the 10 week program. The delivery method is video lecture and discussion forums.

In this class we will discuss and relate real world problem and ways to work through them as the company officer. We will use real situations and events to discuss and provide solutions to commonly encountered problems.

As a fire service, many new officers struggle with the day to day encounters and problems dealing with crew dynamics, difficult members, and drilling.

Additionally, we will discuss and provide ideas on setting expectations, creating personal goals to assist in your own development, creating company drills, and providing input for operational guidelines.

As a student in this class you will have unlimited access to forms, worksheets, templates, a template for a daily officer's journal and to a private Facebook page to collaborate in.

Thanks for your interest and I look forward to sharing with you soon.

A FREE version of SimsUshare will be given to one random student.

Price is \$100 if paid prior to Sept. 1, 2015!

Instructor: Jason Hoevelmann, Battalion Chief
